Profile Summary

Dedicated IT professional with a focus on merging roles in project management and technical leadership, I bring a balanced skill set in Microsoft stack development, DevOps, and strategic management. My career has involved managing complex IT projects, leading diverse teams, and contributing to technological advancements while maintaining a grounded approach. I place strong emphasis on interpersonal skills, believing in the power of collaborative team dynamics and effective communication.

My technical background is rooted in .NET, DevOps, and security tool management, where I strive to develop solutions that are both efficient and aligned with organizational objectives. As a project manager and aspiring CTO, I understand the importance of balancing technical acumen with the human side of technology leadership. I am keen on roles that allow me to apply my IT expertise in a setting that values team development and strategic decision-making.

Professional Competencies & Skills:

- **Certifications:** PMP Certified, demonstrating comprehensive knowledge and application of project management principles.
- **Project Management & Leadership:** Experienced in leading full project lifecycles, adept in resource allocation, budgeting, and financial management. Effectively align team objectives with project goals, ensuring on-time and within-budget delivery.
- **Interpersonal Skills:** Strong communicator, skilled at fostering team collaboration and efficiency. Experienced in mentoring team members and enhancing teams.
- **Technical Expertise:**
 - **DevOps & CI/CD Pipelines:** Proficient in implementing DevOps methodologies, creating and managing efficient CI/CD pipelines for optimized software development and deployment.
 - **Programming & Development:** Skilled in C#, .NET, NodeJS, with a firm grasp of database architecture and server solutions.
 - **Tools & Technologies:** Experienced in Azure, Terraform, GitHub actions, with expertise in managing on-premises server solutions and security tools.
- **Adaptability & Continuous Learning:** Quickly adapts to new technologies and methodologies. Committed to ongoing professional development, keeping up-to-date with industry advancements and technological trends.

Work Experience

Technical Lead and DevOps Lead

Afa försäkring, Stockholm (September 2021 — Current)

- Managed the Azure DevOps infrastructure, overseeing extensions, boards, teams, rights, repos, pipelines, artifacts, PATs, test plans, and more.
- Assisted in setting up pipelines, test environments, Kubernetes connections, rights, scripts, etc.
- Executed a migration from an on-prem DevOps solution to the cloud, ensuring seamless integration and execution.
- Managed budgets, allocated resources, and acted as a Product Owner for multiple tools.
- Mentored junior team members.

Lead Software Engineer

Volvo, Göteborg (June 2020 — June 2021)

- Collaborated with Hcl-technologies for Volvo Cars in .NET Core development and documentation.

Backend Developer

IKEA, Malmö (September 2019 — March 2020)

- Enhanced ordering and sell/buy systems, and led backend development in .NET.
 - Mentored junior team members

Lead Developer/Architect

IKEA, Malmö (September 2020)

- Designed structures based on client requirements and established foundational code structures.

Backend Developer

Tetra Pak, Lund (February 2019 — May 2019)

- Developed a data transformation system and collaborated closely with clients.
 - Mentored junior team members

Professional Development & Courses (Capgemini):

- **Communication & Collaboration:**

Presentation and Inspiration (April 2019), Communication and Collaboration (October 2018)

- **Sales & Project Management:**

Central Course Sales and Delivery (February 2019), Case to Sell a Project/Product to Managers (September 2019)

- **Technical & Engineering:**

Service Engineer Design Principles (January 2019), DevOps Introduction (May 2018), Azure Study (December 2017), DevOps Course and Training for the Certificate (September 2019 to October 2019)

- **Facilitation & Workshops:**

Workshop Facilitation (December 2017 to April 2018)

- **Capstone Project on Ignite Program:**

Spearheaded a team project to design the ideal workflow for an application from its initial concept to its launch. As the primary developer, I was responsible for the architecture, infrastructure, tool selection, and establishing the workflow, starting with a minimum viable product (MVP). This project, culminating my participation in the Ignite Program, stood out among 15 competing teams, leading us to win the event. It was an invaluable experience that highlighted my capability to integrate various facets of application development, illustrating my potential in both team collaboration and technical proficiency, even in the early stages of my career.
