## Profile

Dynamic IT Architect with 26+ years of expertise, including 19 years at Ford Motor Company. Skilled in cloud transformations, data architecture, and enterprise-wide migrations like Data Center of Future. Proven leader in reducing technical debt, driving innovation, and delivering scalable, efficient solutions. Known for aligning technology strategies with business goals and fostering collaboration to achieve impactful results. Passionate about sustainability, future-state architectures, and empowering organizations in dynamic landscapes.

## Employment History

### Enterprise Architect at Ford Motor Company, Chennai

JULY 2023 – PRESENT

- Championed cloud adoption of GCP/SaaS solutions aligned with Ford's strategy. Delivered EA perspectives for effective GCP migrations.
- Designed and implemented future-state architectures, and led key data integrations.
