---

## Summary

- Fadia has 2.5 year experience in data. Despite that Fadia earned a Bachelor degree in languages and literature, she preferred to build her career in data.
  - At the beginning of 2019, Fadia earned an internship at the Center for Strategic Study. There she dealt with research and qualitative data analysis.
  - In the same time she got a job with civil organization as a data analyst using SPSS. This experience gave her the chance to work with quantitative data, surveys, writing reports, and visualization.
  - In September 2019, Fadia got a job as a Junior data analyst in American company (Remotely). This job gave Fadia the chance to deal with different data and clients. She used Python, Alteryx, Spreadsheets, Tableau, etc...
  - Fadia is an active person. She volunteer at university to help other students. Moreover, She participated with Friedrich-Ebert-Stiftung in a leadership for two year.
  - Fadia is interested in Business, Marketing, and Finance analysis.
-
