## Career Summary

I have started my career as a supply chain professional & shifted my enthusiasm into business process automation. Experience of managing multiple end to end SAP ERP implementation projects as a core team member for functional modules of PP, MM & PM & support role after implementation phase. As well as continued my journey in business facing experience of working in diversified areas of supply chain including core production, raw materials planning, production planning, demand planning, process development etc.

## Experiences:

### **SAP Functional Analyst (PP-PM), MIS-IT, Healthcare Pharmaceuticals Ltd.**

**Duration:** August, 2021-Present

#### **Responsibilities:**

- To provide functional solutions regarding problematic production & maintenance business transaction
- Maintain forecast data in SAP & communicate with marketing & production team regarding changes in forecasting data.
- Prepare functional specification & share with ABAP team for development of new t-code/report for new process development.
- Follow up PM & PP master data creation & provide necessary steps for unnecessary master data creation & LSMW for mass upload/creation.

#### **Project:**

Vehicle Management System (VMS): Implemented Total vehicle maintenance & cost analysis in SAP

### **Sr. Executive, Supply Chain Division (Edible Oil), Bashundhara Group**

**Duration:** June, 2020 – July, 2021

#### **Responsibilities:**

- Spare parts planning & procurement coordinator for foreign purchase.
- SAP MM Module functional responsibilities foreign & local procurement.
- Receive requirement from operation department (both electrical & mechanical) regarding capital machineries & their spare parts.
- Communication with operation team for specific requirements & create RFQ for different vendors.
- Based on the quotation discussion with operation team regarding technical confirmation.
- Prepare Purchase Order & communication with Accounts & Banking department for LC Documentation.

- Follow up the deliverable item/machine & continuous communication with supplier.
- Take initiative for capital machineries servicing.
- Lead time analysis & identify the actual reason of delay delivery to take necessary actions.

### **Executive, SCM & Group Production Planning Coordinator**

#### **Padma Group of Converters**

**Duration:** January, 2019 – May, 2020

#### **Responsibilities:**

Monitoring Production Plan for 17 Individual Plant & activities of Production Planning Module on daily basis as a super user. Provide solution for technical issues related to PP module. Analysis customer demand trend, supply trend & provide guide line to planners to meet the customer demand in time.

#### **Achievements:**

- Implementation of auto Material Requirement Planning (MRP)
- Experience of working in diversified products in both SCM & production planning departments
- Total group production process designed in the SAP through planning module
- Implementation of BOM in the process engineering for actual product costing
- Successful implementation of SFG & RM Stock visualization
- Implementation of Planning Table (MF50-SAP) in B2B

### **Project: Synergy (Core Team Member (CTM) of PP & MM Module)**

**Duration:** January, 2018 – December, 2018

SAP s/4 Hana Implementation member & played leading role for successful go live of 17 plants. Cross functional knowledge with other modules like MM, SD, QM, PM, FICO. Material Master Design (RM, PM, SFG & FG). The activities during the projects are Inventory Management, BOM design, Mapping & configure at SAP, train production & planning personnel accordingly. Prepare SAP related SOP for Planning department, sales department and distribution department. Our team awarded as “The Best Run: SAP Go Live” in SAP Intelligent summit 2019, Dhaka. **Acting Super user of PP & MM module.** One of the major responsibility as CTM is follow up Sales Order Management & ensure in time delivery through integrated Production Planning for smooth operation.
