Dubai Internet City

Objective

To work in a setting that supports my professional development and success, one in which I can effectively apply my knowledge and abilities. From Nepal till now, when I moved to Dubai, I have been fully immersed in the sector. For clients, I'm managing several portfolios with excellent planning and quick execution. When an unexpected difficult problem occurs in the market that can't be solved without thinking outside the box, it has been a truly intriguing new challenge for me. I want to be able to tackle complex problems as quickly as humanly can in the future.
