Work Experience

JAVAR S.A.S. (2012 - January / 2020 - November)

Administrative and Logistics Director

I'm the manager of the definition of strategies that allow inventory control, including, standardization of inventory levels, cost reporting, profitability of the organization's operations, aligning processes between the areas of sales, logistics and national purchases and import orders.

- Acquire and manage a wide range of inventory, working with sales to define consensus demand/forecast plans that support total value and cash flow targets.
- Provide direction for the design, planning, development and implementation of strategic initiatives related to Supply Chain & Logistics infrastructure and functional activities.
- Proactively lead cross-functional teams to identify improvement opportunities; drive results, meet logistics cost targets and execute functional business planning process.
- Lead the logistics, materials and supply chain departments, ensuring they perform in line with company targets.
- Build strong relationships with suppliers, ensuring material availability and supply standards remain high, reliable and consistent.

JAVAR S.A.S. (2008 - January / 2011 -December)

Chief of Production and Operations

I'm the manager of the planning and scheduling of the company's production, guaranteeing product availability, maintaining inventory levels of finished product according to the needs of the commercial area. Responsible for the maintenance area of the production plant, ensuring availability of machine tools.

- Responsible for the organization, definition and planning of production, increasing the installed plant capacity in order to have product inventory availability with quality and at a lower cost.
- Responsible for the fulfillment of the production scheduling in delivery times and scheduled units.
- Definition of production routes and updated bills of materials in the information system (ERP).
- Definition of the requirements of raw materials and materials to the purchasing area for the execution of the production scheduling in the established time.
- Responsible for the standardization of production processes, bills of materials, reduction of operation times, achieving a production planning in accordance with real manufacturing times.
- Analysis of the cost of production orders, controlling execution times, cost of raw materials and materials and in this way be in line with corporate profitability objectives.

- Responsible for coordinating preventive and corrective maintenance tasks for facilities and equipment in employees in the production process.
